Attorney Docket No. 10022/24

Amendments to the Claims

This list replaces all previous versions and listings of the claims in this application.

Listing of Claims:

1. (Currently amended) A method of evaluating a business proposal, comprising the steps of:

gathering information relevant to the proposal, wherein the information comprises revenue elements of the proposal, risks, descriptive information, business issues, business goals, a value of the proposal, a cost of the proposal, methods of achievement of the proposal, and an innovation value of the proposal, and wherein the proposal includes at least two alternative structures between a purchaser and a provider selected from the group consisting of an alliance, an acquisition, an equity venture, a partnership, and a venture;

evaluating the gathered information by computer; and

ranking the at least two structures ~~according to the evaluation of the gathered information by cost, a rate of return, an assessment of potential future benefits, and a revenue stream.~~

2 (canceled)

3. (Previously presented) The method of Claim 1, wherein the information gathering step further comprises answering predetermined questions on at least one template stored in a computer and the answers to at least one predetermined question call up at least one more template of predetermined questions, and the computer uses answers to said questions to evaluate the proposal.

4. (Previously presented) The method of Claim 1, wherein the proposals are evaluated by calculating at least one of a revenue stream, a return on average assets, a return on investment, a return on equity, an internal rate of return, and a net present value.

Attorney Docket No. 10022/24

5. (canceled)

7. (Previously presented) The method of Claim 1, further comprising displaying the rankings with a graphical user interface.

8. (Previously presented) The method of Claim 7, wherein the rankings are presented in a Harvey-ball format.

9-11 (Cancelled)

12. (Previously presented) The method of Claim 1, wherein the information is input to the computer through a graphical user interface by choosing selections from at least one of a drop-down screen, a scroll screen, a check box, and a list box.

13. (Previously presented) The method of Claim 12, wherein the graphical user interface uses a technique selected from the group consisting of a drop-down selector screen, a scroll screen, and a check box.

14. (Previously presented) The method of Claim 1, wherein the proposal comprises an offer of a service from the provider, and further comprising the step of calculating a way to pay for the proposal.

15. (Previously presented) The method of Claim 1, wherein the structures are ranked by displaying a numerical output.

16. (Previously presented) The method of Claim 1, wherein the information is provided through a graphical user interface, and the input is in a form of brief numerical or pseudo-numerical outputs.

Attorney Docket No. 10022/24

17. (Previously presented) The method of Claim 1, wherein an output is provided through a graphical user interface, and the output is in a form of brief numerical or pseudo-numerical outputs.

18. (Currently amended) A method of evaluating a business proposal, comprising:

searching at least one database for information concerning a business partner, the proposal and a business environment, wherein the information includes cost drivers, revenue drivers, markets served, risks of the proposal, customers served, and a competitive advantage;

providing financial data concerning the proposal to a computer, wherein the financial data includes revenue elements of the proposal, a cost of the proposal, and an innovation value of the proposal;

proposing at least two alternative structures between a provider and a purchaser for the business proposal, using said financial data and information from the database, wherein the structures are selected from the group consisting of an alliance, an acquisition, an equity venture, a partnership, and a venture; and

calculating an advantage of the structures based on the searched-for information and the provided financial data, wherein the advantage is calculated based on the cost, a rate of return, an assessment of potential future benefits, and a revenue stream.

19-21 (cancelled)

22. (Previously presented) The method of Claim 18, further comprising the step of entering information concerning strength of a business relationship by entering a number from 1 to 5, and wherein the step of calculating the advantage of the structures is based on the entered information concerning the strength of a business relationship.

Attorney Docket No. 10022/24

23. (Original) The method of Claim 22, wherein the information is entered through at least one template stored in the computer.

24. (Original) The method of Claim 23, wherein the information entered through at least one template calls up at least one template of predetermined questions, and the computer uses answers to said questions to evaluate the proposal.

25. (Previously presented) The method of Claim 18, wherein the advantage is calculated as at least one of a revenue stream, a return on average assets, a return on investment, a return on equity, an internal rate of return, and a net present value.

26. (Original) The method of Claim 18, wherein the advantage is calculated as at least one revenue stream and includes at least one example of how to pay for the proposal.

27 (canceled)

28. (Original) The method of Claim 18, wherein the advantage is recalculated by a step of entering updated data into the computer.

29. (Original) The method of Claim 18, wherein the step of searching comprises a search of at least one Internet site, and further comprising the steps of updating the search periodically, and updating the computer calculation of an advantage periodically.

30. (Previously presented) The method of Claim 18, wherein the information is provided through a graphical user interface.

31. (Previously presented) The method of Claim 18, further comprising a step of providing an output through a graphical user interface.

32. (Currently amended) A computer system for evaluating a proposal, comprising:

a computer processor;

at least one memory operably connected to said computer, said memory containing data relevant to the proposal, wherein the data comprises revenue elements of the proposal, risks, descriptive information, business issues, business goals, a value of the proposal, a cost of the proposal, methods of achievement of the proposal, and an innovation value of the proposal; and

a computer program residing in said computer or in said memory, wherein the proposal includes a plurality of alternative structures between a purchaser and a provider selected from the group consisting of an alliance, an acquisition, an equity venture, a partnership, and a venture, and the computer program is configured for calculating and generating an output for evaluating the plurality of structures based on said data relevant to the proposal the cost, a rate of return, an assessment of potential future benefits, and a revenue stream.

33. (Previously presented) The computer system of Claim 32, wherein the computer program is configured for generating a graphical user interface for at least one of inputting or outputting information.

34. (Previously presented) The computer system of Claim 32 wherein the computer program output is a series of numerical ratings from 1 to 5.

Attorney Docket No. 10022/24

35. (Original) The computer system of Claim 32 wherein the computer program further comprises at least one template of predetermined questions, and the computer program uses the answers to said questions to evaluate the proposal.

36. (Previously presented) The computer system of Claim 32 wherein the answers to at least one predetermined question call up at least one more template of predetermined questions, and the computer program is configured to evaluate the proposal based on the answers to said questions.

37. (Previously presented) The computer system of Claim 32 wherein the output is a series of Harvey balls.

38. (Original) The computer system of Claim 32, wherein the computer program uses a technique of control-action-response in seeking and inputting information from a user of the computer system.

39. (Previously presented) The method of Claim 1, wherein the alternative structures between the purchaser and the provider differ in an amount of equity owned by the purchaser and the provider.

40. (Previously presented) The method of Claim 1, wherein an advantage of at least one of the structures is creation of an asset.

41. (Previously presented) The method of Claim 1, wherein the provider furnishes information to the purchaser demonstrating a difference in value to the purchaser based on the alternative structures.

Attorney Docket No. 10022/24

42. (Previously presented) The method of Claim 1 wherein at least one of cost drivers and revenue drivers is used to evaluate and rank the structures.

43. (Previously presented) The method of Claim 1, wherein the values of the at least two alternative structures are calculated as revenue streams to the purchaser.

44. (Previously presented) The method of Claim 1, wherein the values of the at least two structures are calculated as at least one of a revenue stream, a return on average assets, a return on investment, a return on equity, an internal rate of return, and a net present value.

45. (Previously presented) The method of Claim 18, wherein the provider is a service provider and the advantages of the structures are calculated as a revenue stream to the purchaser.

46. (Previously presented) The method of Claim 18, wherein the alternative structures differ in an amount of equity owned by the purchaser and the provider.

47. (Previously presented) The method of Claim 18, wherein an advantage of at least one of the structures is creation of an asset.

48. (Previously presented) The method of Claim 18, wherein at least one of cost drivers and revenue drivers is used to calculate advantages for the structures.
